CAREER OBJECTIVE

Final-year B.Tech Information Technology student with hands-on experience in cybersecurity, network security, and backend development. Skilled in vulnerability assessment, web application testing, Linux, Python, and SQL. Seeking an entry-level Cybersecurity Analyst or SOC Analyst role.

EDUCATION

B.Tech, Information Technology 2023 - 2027
Shri Govindram Seksaria Institute Of Technology And Science

TRAININGS / CERTIFICATIONS

Jr. Penetration Tester
Sep 2026 - Present

Tryhackme, Virtual

Learned reconnaissance, information gathering, enumeration, vulnerability assessment, and web application security testing.Gained practical experience with tools such as Nmap, Burp Suite, Hydra, Gobuster, and Metasploit in controlled lab environments.Practiced identifying and exploiting common vulnerabilities, including SQL Injection, authentication flaws, command injection, and privilege escalation.

Introduction Of Cybersecurity
Jul 2026 - Aug 2026

CISCO, Virtual

Completed Cisco's Introduction to Cybersecurity online training.
Learned cybersecurity fundamentals, the CIA Triad, threat landscape, and common attack vectors.
Studied malware, phishing, social engineering, network security, and risk management concepts.
Gained practical knowledge of security best practices, digital privacy, and incident response basics.

CCNA
Nov 2025 - Jan 2026

Cisco networking academy, Virtual

Learned networking fundamentals including TCP/IP, OSI model, IPv4/IPv6, subnetting, and network protocols.Gained practical knowledge of routers, switches, VLANs, routing, DHCP, DNS, NAT, and wireless networking.Practiced network configuration and troubleshooting using Cisco Packet Tracer, along with basic security concepts and tools such as Nmap, Hydra, and Burp Suite.

CompTia Security+
Aug 2025 - Oct 2025

CompTIA.org, Virtual

Learned cybersecurity fundamentals including threats, vulnerabilities, risk management, security controls, and incident response.Gained knowledge of network security, identity and access management (IAM), cryptography, secure architecture, and cloud security.
Developed an understanding of security monitoring, vulnerability management, security operations, and cybersecurity best practices.

PROJECTS

Cyberfraud Detection System
Jul 2026 - Aug 2026

Tech Stack: Python, FastAPI, VirusTotal API, PostgreSQL, React

- Developed a cybersecurity web application that detects phishing and malicious URLs using the VirusTotal API.
- Integrated VirusTotal's REST API with an API key to retrieve real-time reputation and threat intelligence for URLs.
  VirusTotal
- Classified websites based on detection results from multiple security engines and displayed threat severity through a secure dashboard.
  VirusTotal
- Stored scan history, verdicts, and timestamps in PostgreSQL to support security monitoring and incident analysis.

SKILLS

- Wireshark
- Burp Suite
- Nmap
- Metasploit
- Linux
- Python
- Kali Linux
